

Comments from teachers

Just brilliant! The children get so much from these workshops. Cannot recommend enough.

Fabulous problem solving opportunities - pupils were so engaged & all actively learning.

Great opportunities for skills development over a range of social & cognitive areas.

Very relevant to CfE, STEM and skills for learning, life and work.

Teachers can observe children - sometimes a rare activity!

The workshop met the needs of every pupil in my class even the reluctant learners.

Appreciated being asked in advance if I had children with additional support needs.

Great way of covering the curriculum that we don't have the knowledge/resources for.

I have never seen my pupils work together, persevere and stay on task for such a long period of time!

Ann has a great wealth of knowledge; the children adore learning from her - she certainly makes learning fun!

A fantastic, creative experience for my class – appreciate the thought and planning that has gone into this.

The Workshop Guides are fabulous - E&Os and follow-up ideas.

A super activity for transition. Fun, motivating and builds resilience.

Have used for years and will continue to...

K'NEXT Generation is owned and run by Ann Larkham, Scotland's only professional K'NEX Training Consultant.

As one of a UK wide network of consultants, K'NEXT Generation provides Curriculum for Excellence (CfE) linked STEAM workshops for pupils and teachers.

These workshops are designed to help develop skills for life including problem solving, creativity, communication and teamwork. They also promote a growth mindset.

The workshops take place in an inclusive and supportive atmosphere in which everyone is encouraged to learn, to have fun and to achieve their full potential.
